

# A Call to Action: Save Vaping!

If *you* or *anyone* you know uses electronic cigarettes, then you should sign this.

The EU wants to regulate ecigarettes out of existence.

If current plans go ahead, every electronic cigarette available today will become illegal, and you, as a vaper, will be breaking the law.

## You **CAN** make a difference.

If the European Free Vaping Initiative (EFVI) can collect one million signatures throughout the EU (including 54,700 in the UK) vapers will be able to protect their right to use ecigarettes. This is NOT another petition, this is a mechanism within the EU which allows you, the citizen, to have a direct say in government.

## But **EFVI** need **YOUR** help to make it happen.

To make a difference, please visit **EFVI.EU**, and please tell all your friends and family.

## Together, we **WILL** make a difference.
